

ALFAPRO

Cookies

INGREDIENTS

DOUGH

1 Alfapro cookie "Cookies"
kilograms
130 WATER FOR LIGHT/DARK
g/180 CAKES
g

140 g butter or margarine

additives add according to
preference

A METHOD OF PREPARING

1 Baking cookies is a wonderful adventure that allows for creativity and customizes the treats to your own taste preferences. Here is a simple recipe for cookies that you can enhance with your favorite additions.

2 Mix all the ingredients for 5 minutes until you achieve a uniform mass. Add the chosen extras and mix until the ingredients are combined. Use an ice cream scoop to form balls and place the dough on a baking sheet. Bake in an oven preheated to 160 degrees Celsius for about 15 minutes.

3 After baking the cakes, you can further enrich their flavor by using: Flexiglaze, Alfapro creams: Nutty type, Crocco, etc.

Bon appétit!

Smacznego
